Safety Policy of NGEL & its Subsidiary

Applicable to all employees of NGEL, its Subsidiary and are required to comply.

Chief Executive Officer of NGEL is responsible to issue and review the Safety Policy periodically describing intent, responsibility and broad frame work.

A. Statement of Intent:

Safety is part of our core values; therefore, safety shall be at the forefront of all our activities.

We recognize all accidents are preventable.

The objective is to provide safe working environment and strive for zero incidents at work. This policy, supported by safety rules and procedures, is applicable for all business activities carried out by NGEL & its Subsidiary.

Safety policy is built around following principles:

1. Our activities carry various hazards; however, all such hazards can be identified.
2. Every job shall be done safely, no matter how important or urgent it is.
3. Putting people to work carries a specific responsibility and accountability for safety which shall be visibly demonstrated.
4. Right procedures and actions can bring the risks under control.
5. Trained and committed team can ensure incident free operations.
6. We shall comply with all applicable safety regulations and other legal requirements. We shall strive to improve and make it better than the minimum standard(s).

B. Organization's Responsibility:

We have a tier wise approach to make work place incident-free:

1. Top Management responsibility:
 - a. Cluster head & head of AMG are accountable for:
 - i. Ensuring that all work activities under their control are carried out in adherence with this policy;
 - ii. Ensuring that Heads of Projects / Stations are individually accountable for implementation of this policy and ensuring they have the necessary skills in safety management;
 - iii. Setting appropriate standards for safety in their work area;
 - iv. Putting Safety as a part of appraisal system, both for self and their teams;
 - v. Ensuring that safety audit is conducted periodically at all sites;
2. Head of the Project/Stations/EIC are accountable for:
 - a. Implementing this policy by introduction of local management systems/SOP with high standards of safety;
 - b. Ensuring identification and display of all hazards;
 - c. Establishing rotating cross-functional team for internal audits.
 - d. Making employees accountable for working safely by creating a safer work environment and ensuring that their actions do not harm either themselves or

other people.

- e. Ensuring that the Engineer-in-charge (EIC) shall spot, report and deal with hazards to help create safe and incident free workplace.
- f. Ensuring training of workers in the area of work and awareness about the hazards of the site.
- g. Ensuring that the contractor has deployed safety equipment relevant to its area of operation.
- h. Making sure that EIC ensures cordoning of unsafe areas and reports unsafe conditions
- i. Make certain that all co-operate with management and observe rules and procedures which enable the highest standards of safety to be achieved.

This Policy will be effective only with the support from all the employees and contractors. Accordingly, every employee shall be a signatory to this safety policy and shall be responsible and accountable for safety in their work area and activities.

C. Policy framework and coordination:

a. Training:

- i. Head of HR-NGEL shall ensure that appropriate training and learning interventions are designed and implemented.
- ii. Corporate Safety department shall come up with detailed requirements (Including skill training and culture building) clearly bringing out the desired objectives, audience and responsibility.

b. Communication:

Wider dissemination of Safety policy, rules, safety analysis and best practices shall be the responsibility of Corporate Safety department in association with the Corporate Communication department.

c. Safety Plan & Provision for Contractors:

- i. Contractual provisions shall be reviewed by CC-Safety, C&M in association with AMG Engineering and PM for all packages and provide guidelines to Stations / Projects to implement the same in site awarded packages.
- ii. Safety plan to be submitted by contractor and approved by NGEL before start of any work.
